

## **EXHIBIT D**

**Brandon Maddox**  
Thanks for the response. Yes, my website <FFL123.com> was hacked. They changed the index page to "no follow" for google indexing, took me 30 days to discover. They logged into my hosting control panel and downloaded all files and changed logo and uploaded to fitrust.com, they now promote via google adwords. Suggestions to resolve this issue? I hired www.dinca.com, but they have no guarantee on how to resolve

3:08 PM

CloudFlare received your copyright infringement complaint regarding fitrust.com Please be aware CloudFlare is a network provider offering a reverse proxy, pass-through security service. We are not a hosting provider. CloudFlare does not control the content of our customers. Accepted URL(s) on www.fitrust.com: http://www.fitrust.com/ Hosting Provider: ----- ROOT-195-26-4-0-23 Abuse Contact: ----- abuse@pass577.net We have notified our customer of your complaint, and we have forwarded your complaint on to the responsible hosting provider. You may also direct your report to: 1. The provider where fitrust.com is hosted (provided above); 2. The owner listed in the WHOIS record for fitrust.com and/or; 3. The contact listed on the fitrust.com site. Note: A lookup of the IP for a CloudFlare customer website will show CloudFlare IPs because we are a pass-through network. The actual website is still hosted at the hosting provider indicated above. If the hosting provider has any questions, please have the hosting provider contact us directly regarding this site. Due to attempted abuse of our complaint reporting process, we will only provide the IP of fitrust.com to the responsible hosting provider if they contact us directly at abuserply@cloudflare.com. Regards, CloudFlare Abuse

My website is FFL123.com, hacker are running fitrust.com

3:10 PM

**Rabul Islam**  
Hi Brandon,

3:49 PM

Thanks for your response. First I can secure your website to make sure it won't get hacked again, then we can take some actions against those who stole your content. Please add me on skype at: rabulislam304 so that we can discuss further and make a decision.

Thanks,  
Rabul

**Brandon Maddox**

Hey Rabul I have a new website going live any day. This will be on a new server and should be more secure. I have developers already almost done with this project. Possible to hire you to focus efforts on getting fitrust.com removed? I think google awords are down, do I need to hire attorney? Best options to remove content from the fitrust.com? I have legal ownership.

4:05 PM

\* google adwords seems to be gone

**Rabul Islam**

Yes, you can hire attorney and I can put together the evidence for you and guide the attorney. However, it might will take more time to do that. Apart from that, I can also hit and down fitrust.com if you want.  
*(forward)*

4:23 PM

**Rabiuul Islam**  
so at this point, what do you want me to take care of? Shall I take down the site or only help your attorney to file the case before securing the site/ server?

4:43 PM

**Brandon Maddox**  
Developers are in Vietnam - <https://www.elance.com/s/codeandmore/> and the testers who test before going live are in Russia - <https://www.elance.com/s/webdoga/>

4:43 PM

Attorney maybe expensive and time consuming, too many other countries involved. If google adwords is gone as a tool to promote, maybe we have time I work to get website ready for live and then have you review server?

**Rabiuul Islam**

Yes, that's what I thought. First, what we do then? You set your web application and server ready then I'll do vulnerability assessment on both of them and secure them. 2. We hit the fake site and take that down for few times until they don't take down your control.

4:46 PM

**Brandon Maddox**  
okay

I better go to bed. Any idea where they are from?  
Seen anything like this before?

4:48 PM

**Rabiuul Islam**

Just for the information, vulnerability assessment on any web application takes about 40+ hours and fixing depends on the findings. vulnerability assessment+ fixing findings on the server : about 30+ hours. Take down any domain from online : \$1000 excluding upwork fees. I can give you a discount with the rate of \$95.56 including upwork fees.  
yes, seen many times. Can't tell where they are from without investigating further

4:50 PM

**Brandon Maddox**

okay, you think do 70 hrs of work before going live?

4:53 PM

**Rabiuul Islam**

Yes, that will confirm it's security on both server and web app side

4:54 PM

**Brandon Maddox**

okay, we shall talk tomorrow sir.

4:54 PM
